Re: **F.W. Webb Project**
Concord, New Hampshire

Dear Rob,

I'd like to personally thank you and your team for another successful F.W. Webb project completion. From the outset, Riess Construction was instrumental in the proper coordination of this large warehouse mainframe/ mezzanine erection, standing seam roof and wall system installation. It is no surprise that you were able to finishing a project of this size and scope on schedule, with no punch list and no callbacks. It is a testimony to Riess Construction's dedication, attention to detail and work ethic.

From day one, you manned the job with all personal and stayed with it through the duration. As always, safety is your first priority. You provide you workforce with efficient and safer tools and equipment. Having your own crane, fork trucks and lifts sets your company apart from other steel erectors we have worked with.

Kindly share this letter with Charlie, Bill and the rest of crew. They are true professionals and Dutton & Garfield, Inc., JM Coull, Inc. and F.W. Webb could not be more pleased at how well this project has turned out. We look forward to teaming with you again soon.

Keep up the great work!

Very Truly Yours,

Keith A. Wentworth
Vice President/Project Manager
