Re: **F.W. Webb Project**
Gilford, New Hampshire

Gentlemen:

We'd like to take this opportunity to thank you and your team for a successful project completion. From the outset, Riess Construction was instrumental in the proper coordination of this large warehouse main frame, standing seam roof, wall system and mezzanine erection. Finishing a project of this size and scope *ahead* of schedule with no punch list and no call backs is rare indeed and is a testimony to Riess Construction's dedication and work ethic.

One thing in particular that sets your company apart from other steel erectors we have worked with, is the fact that you have your own crane, fork trucks and lifts, providing your workforce with more efficient and safer tools.

Kindly share this letter with your foreman and crew. They are true professionals and we could not be more pleased at how well this project has turned out. We look forward to teaming with you in the future.

Keep up the good work!

Very Truly Yours,

Steven R. Webster
President
