Mr. Rob Riess
Riess Construction
11 Lovejoy Rd.
Plymouth, NH 03264

Dear Rob:

This letter is to convey our appreciation for the good job done in our various purlin-bracing upgrades. As you know, Factory Mutual was here today and inspected the installation with a positive comment of “very nice job”. The response you and Charlie showed to the two minor issues FM found today was appreciated. FM’s buy in to any efforts to reduce Watt’s exposures is critical ensuring Watts continued liability coverage. Your willingness to work over Good Friday was beneficial for all parties.

The level of communication on all levels was excellent. The foundry buildings were particularly difficult given lack of access and the dust conditions encountered. The additional burden of the tyvek suits and showering at the end of each day, didn’t curtail the crew’s immediacy, efforts and attitude. A couple of other adverse situations were handled with patience and professionalism. I would like to personally thank the crew for their efforts.

Charlie Bill Sam Casey Mark Troy

Sincerely,
John Twombly
